

PatientCare... **hypertension**

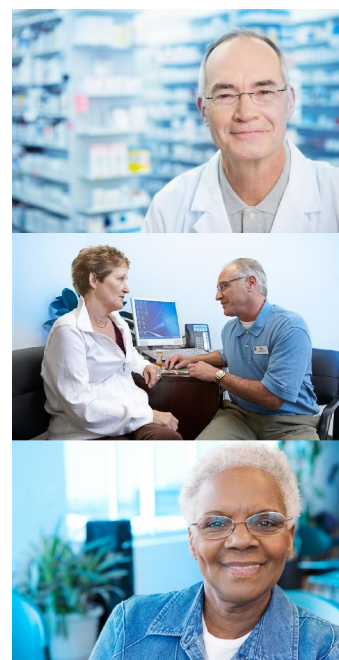

HYPERTENSION THERAPY MONITORING AND FOLLOW-UP

A professional service provided by your Calgary Co-op pharmacy team

Hypertension is a silent disease... It rarely produces symptoms; however, it can lead to severe health problems over time if it is not treated properly.

We are providing a hypertension monitoring service:

- Personalized advice and service from your pharmacist
- Educational material on hypertension
- Blood pressure is measured every time you renew your antihypertensive medication
- With a special module, you can access your blood pressure profile, get information, enter your blood pressure readings taken at home, and review your progress
- And more!

Thanks to this professional service, you get personalized and regular monitoring so that you can reach your blood pressure targets. This service also promotes effective interactions with your health care professionals, and helps to ensure that you receive optimal treatment for your condition.
